HEADLIGHT RESTORATION KIT

WITH POLYMERIZATION FINISH

The Headlight Restoration KIT is an innovative system that allows restoring the sunburned headlights, giving them the original state and brightness and perfect finish in a very fast and economical way.

REF.: APKRO

WETOR 2310

POLYMERIZATION LIQUID FOR HEADLIGHT

The polymerized liquid WETOR 2310 is a consumable for Headlight Restoration kit, it's a innovated system that restore the sunburned headlights in a couple minutes with an outstanding shine. Our product is produced in Europe and is compliant with all EU directives including REACH, wich means all components and concentrations are known, have been studied, analysed and tested.

The product as 600ml and last for around 30-40 headlights, more or less for 15-20 cars.

PROFESSIONAL MICROFIBER CLOTH

Long hair microfiber cloth 40 x 40 cm with great absorption power. Great results.

REF.: CR25014

WETOR 2310

POLYMERIZATION LIQUID FOR HEADLIGHT

Consumable for the Headlight Restoration Kit. Available separately.

REF.: APKRO/1

WETOR 965

UNIVERSAL ACRYLIC CLEAR COAT

Clear coat specially formulated with thermoplastic acrylic resins. Very fast drying. Due to its high transparency, brightness and hardness it is suitable for application on polycarbonate car headlights, for protection and shine.

Easy and fast application:

- Sand and the headlight surface, until polished.
- Clean the surface of dust and grease.
- Apply 2-3 layers directly, waiting 10 to 25 minutes between each application.

REF.: 965

NEW

TOTALGRIP

SPRAY GUN GRIP

Introducing TotalGrip, the revolutionary handle adaptable to most of all types of spray guns, ensuring greater comfort and control during the painting process. Experience superior grip and precision with TotalGrip, making your painting tasks easier and more efficient than ever before. Simple slide it onto your spray gun, and you are ready to paint.

REF.: TOTALGRIP

Available in 4 colours:

**COMPATIBLE WITH MOST
HVLP PAINT SPRAY GUNS**

- Complete control of the painting process
- Ergonomic grip
- Reduces hand fatigue
- Greater comfort at work
- Precision in spraying
- Resistant to paint and solvents
- Quick installation in just seconds

MAGNETIC FINGER

Simply slide Magnetic Finger onto your index finger and when you have the metal object on your finger use your thumb to manipulate it when needed.

Universal size for all hand types.

REF.: MF3000

Thanks to the powerful incorporated magnet, it allows you to hold and retrieve any small metal object with precise control.

- Drive screws in tight places
- Hold a nail securely
- Drive a screw into a tight spot
- Retrieve metal objects

POWER
AT YOUR FINGERTIPS

Applications:

- General manufacturing and assembly
- Automotive
- Maritime sector
- Home repairs
- Carpentry

MAGNETIC FINGER[®]

Q-BOND

ULTRA STRONG ADHESIVE & FILLING POWDER

Q-Bond represents the latest technological advancement in adhesives for the repair of almost all types of materials. Q-Bond consists of a two-component system – adhesive plus filling and reinforcing powders– that, when combined, have unique and insurmountable adhesive, filling and reinforcing capabilities, repairing broken parts, holes, fissures very fast and economically. The treated surfaces may be, if necessary, sanded and painted.

Use the black particles in:

- All types of plastic (except PE).
- Rubber.
- Carbon fibre.
- Composite materials.
- Fibre glass.
- Wood.
- Etc.

Use the grey particles in:

- All kinds of materials and alloys (except stainless steel).
- Grey colour plastics (except PE).
- Etc.

WETOR 106

UNIVERSAL PLASTIC REPAIR (50ML)

REF.: 106

- Ideal for bonding and sealing most plastics, as well as bonding structural elements in the car body; also suitable for industrial applications.
- Includes 1 mixing nozzle with each cartridge.
- Black colour.

WETOR 109

2K METHACRYLATE STRUCTURAL GLUE (50ML)

REF.: 109

- High resistance to temperature and chemicals.
- No need for primers or sanding before application.
- Maintains elasticity.
- Applicable to various types of work and materials (sanding, drilling, painted, etc.).
- Yellowish colour.

METALLIC GUN

FOR 2K 50 ML CARTRIDGES

REF.: GUN50

- Metal gun for the application of 50 ml bicomponent polyurethane plastic cartridges.

FIBRE REINFORCED

PLASTIC MESH

REF.: FIBREREINFORCED

- Excellent for plastic repair.
- Ideal for reinforcing important fissures. · Length: 3,6 m.

PLASTIC WELDER

WITH 10 UNIVERSAL RODS AND 2 REINFORCEMENT MESHES

REF.: BR03065: PLASTIC WELDER KIT.

REF.: BR03063: STAINLESS STEEL REINFORCING MESH (2 UNITS)

Made from cast brass.
It has a pointy tip to get into corners

The Plastic Welder Repair Fiberflex Kit contains everything you need to repair all plastics.

Benefits

- 200 watt ceramic-core heating element provides you with the necessary heat to apply the FiberFlex universal welding rod and melt in the Stainless Steel Reinforcing Mesh.
- Special tip (see below) allows for easy spreading and shaping of the FiberFlex universal welding rod. And, because the tip comes to a point, you can easily get it into corners and tight spots.
- Stainless Steel Wire Mesh creates repairs that are often stronger than the original part.
- FiberFlex is an universal welding rod thus eliminates the need to identify the plastic.

PLASTIC RODS

FOR WELDING

Available in sizes: S, M, L, XL.

WETOR 694

HAND WASH WITH MICROSPHERES AND DISPENSER

WETOR 694 is a solvent-free hand cleaner with a strong micro-brushing action thanks to the micro-spheres present in the washing cream.

Quickly removes oil, grease, paint, wax, bitumen, plaster and paint. The microspheres make the cream slightly abrasive helping to dissolve the dirt on the skin, leaving it soft and lightly scented.

Apply a quantity of the product in the palm of the hand and spread it in a circular movement. Add a little water and continue the movement, let the product act (30 sec.), rinse with plenty of water and dry your hands well.

Quantity: 3L

Dispenser sold together.
